

Library overview

EndNote 20

We know you're going to love the modern interface redesign in EndNote 20, and this overview guide should help you quickly become familiar with the components that comprise the EndNote library window.

The **Groups** panel shows you both default groups and groups or group sets that you create for your research projects.

Use the **Advanced search** panel to find an item in your library or to query a remote database for new references to capture.

The **Summary** tab displays a detailed overview of a selected reference. Quickly alter reference metadata from the **Edit** tab.

The screenshot shows the EndNote 20 interface. On the left is a sidebar with a 'Groups' panel listing various categories like 'Avian Intelligence', 'Bats', and 'My Groups'. The main area is divided into two panes. The top pane is the 'Advanced search' panel, featuring dropdown menus for 'Author', 'Year', and 'Title', each with a 'Contains' filter. Below this is a table of 'All References' with columns for Author, Year, Title, Journal, Last Updated, and Reference Type. The bottom pane is the 'Summary' tab for a selected reference, showing details like 'Arnett, 2013 #2468', the title 'Evaluating the Effectiveness of an Ultrasonic Acoustic Deterrent for Reducing Bat Fatalities at Wind Turbines', and a detailed abstract. Callouts with purple lines point to these specific features.

Initiate an **Online Search** by selecting a favorite **connection file** or press **more...** to browse your complete list of databases.

The **Reference List** panel shows the individual references stored in your EndNote library, also known as library records.

The **Preview** panel shows you how a reference would appear formatted with a specific output style.
